Exit: Click to close the software.

2 View

Language: Click to select the language to be displayed on the Language list screen.

3 Help

About: Click to open the About window and display the version number.

4 Radio list

Select the radio for which you want to set the time.

The radio model name, the serial number, and the COM port number are displayed.

5 CI-V Address

Select whether to automatically detect the CI-V address or manually set it.

- When the CI-V address of the radio is the default setting, or the Transceive function is set to ON, the CI-V address is automatically detected.
- If you select "Manual," enter the CI-V address into the text box.
 Selectable range: 01 to DF

Ű

6 Create Shoutcut

Click to create a shortcut icon on the desktop. You can launch the software with the following presettings from the created shortcut. Preset items: Radio model name

Serial number

CI-V Address (If selected "Manual")

7 Run

Click to set the radio time to match your PC.

8 Reload

Click to reload the radio list.

Operation

- 1. Open the ST-4003W.
- 2. Click <Run>.
 - The date and time are sent from your PC to the radio.
 - When successful, "The date and time settings have been completed." is displayed.
 ① Depending on the radio, it may take about 1 minute to set the date and time. Even if you cancel the setting while "Sets the seconds." is displayed, the radio's approximate time (± 1 minute) has been set.
- 3. Click <OK> to close the window.

NOTE: You cannot make the date and time settings under the following conditions.

For the radio:

- Turning OFF the radio.
- In the Standby mode.
- Programming the setting data.
- Updating the firmware.
- Importing or exporting a CSV format file.
- Saving the settings.
- Measuring the antenna SWR.

For the PC:

- If the CI-V address for the radio is not correct.
- The USB driver is not installed properly.
- The USB cable is not firmly connected.
